Dear colleagues,

Ovarian cancer management stands at the forefront of innovation, driven by advances in precision medicine, evolving treatment standards, and the integration of new biomarkers.

We would like to invite you to our upcoming webinar: “Optimizing Ovarian Cancer Treatment: Expert Perspectives on Evolving Standards”

This event brings together a renowned panel of Swiss and international experts to explore critical decision points in ovarian cancer care. You’ll gain insights from Prof. Viola Heinzlmann on the surgical vs. neoadjuvant dilemma, and from Prof. Isabelle Ray-Coquard, who will share her deep expertise on both first-line and second-line treatment strategies, including the role of immunotherapy and targeted agents. The session also features real case discussions presented by Dr. Marta Nerone and Prof. Heinzlmann.

Whether you are a gynecologic oncologist, medical oncologist, or involved in multidisciplinary care, this webinar offers an opportunity to reflect on practice-changing developments and refine your therapeutic approach.

We look forward to welcoming you.

Warm regards,
Prof. Dr. med. Isabell Witzel

Optimizing Ovarian Cancer Treatment
